Madurai Vasantham API

Staff Attendance mobile app, REST API reference

Version: 24 Sep 2026 · Base URL: `https://maduraivasantham.com/api`

1. Overview

The staff mobile app uses this API to log in, punch in and out with a selfie, apply for permission and leave, and read attendance logs. The admin endpoints manage shifts, roles and staff accounts.

Item	Value
Base URL (live)	`https://maduraivasantham.com/api`
Base URL (local)	`http://127.0.0.1:8000/api`
Request body	JSON, `application/x-www-form-urlencoded`, or `multipart/form-data` when uploading an image
Response	JSON. Always send `Accept: application/json`
Authentication	`POST /login` returns an access token (Laravel Passport). Send it on later calls as `Authorization: Bearer <token>`
User ID	Numeric, e.g. `100001`. It's returned by login as `userId` and used in the `{id}` path parameters
Rate limit	60 requests per minute per client

2. Response format and errors

Successful calls return HTTP **200**. Most endpoints wrap the result like this:

```
{ "success": true, "data": { ... } }          // or "message": "..."
```

Some lookups return HTTP 200 with `"success": false` and a `message` (for example "No Records Found"). Always check the `success` field, not only the HTTP status.

HTTP	When	Body
200	Request handled	`{"success": true, ...}` or `{"success": false, "message": "..."}`
401	Validation failed or wrong login	`{"error": {"field": ["The field is required."]}}` Login: `{"error": "Invalid UserName or Password"}`
400	Server-side error	`{"error": "\"message text\""}` (the message is a JSON-encoded string)
429	Rate limit exceeded	Retry after the time in the `Retry-After` header

3. Attendance status codes (`atStatus`)

`POST /staff/islogin/{id}` returns `atStatus`. The app uses it to decide how to show the punch button:

atStatus	Meaning

0	Punch button disabled: before the punch-in window opens, or after the shift has ended (then `message` says "Punch in closed ...")
1	Ready to punch in
2	Punched in, so show Punch Out
3	Punched out for the day
4	Leave already applied for today

4. Endpoint list

Authentication

POST	`/login`	Staff login, returns token and shift
POST	`/logout`	Log out

Staff (mobile app)

POST	`/staff/islogin/{id}`	Today's punch status
POST	`/staff/getshift/{id}`	Assigned shift
POST	`/staff/attendance/in`	Punch in with selfie
POST	`/staff/attendance/out`	Punch out
POST	`/staff/attendance/logs/{id}`	Attendance history (paginated)
GET	`/staff/attendance/monthlyLog/{id}/{year}/{month}`	Month calendar summary
POST	`/staff/attendance/dayLog`	One day's check-in and check-out
POST	`/staff/permission/{id}`	Start or end a permission
GET	`/staff/permissionStatus/{id}`	Today's permission status
POST	`/staff/leave/{id}`	Apply for leave
GET	`/staff/leaveStatus/{id}`	Today's leave status
GET	`/staff/leaveLog/{id}`	Leave history
GET	`/staff/profile/{id}`	Profile
POST	`/staff/profile/edit/{id}`	Update profile

Admin

POST	`/admin/register`	Create staff account
GET	`/admin/shifttimes`	List shifts
POST	`/admin/shifttime/add`	Create shift
POST	`/admin/shifttime/edit/{id}`	Update shift
GET	`/admin/roles`	List roles
POST	`/admin/role/add`	Create role
POST	`/admin/role/edit/{id}`	Update role
POST	`/admin/shifttimewithusers`	Assign shift to staff
GET	`/admin/staff/profile/{id}`	Staff profile
POST	`/admin/staff/profile/edit/{id}`	Update staff profile

5. Authentication

POST `/login`

Logs a staff member in with mobile number and password. Returns an access token together with the user's role, shift, and punch-button times.

BODY

Field	Required	Description
`mobile`	Yes	Registered mobile number
`password`	Yes	Password
`deviceInfo`	No	Device name or OS, saved with the last login

RESPONSE 200

```
{
  "success": {
    "userId": 100001,
    "username": "Karthik Raja",
    "designationId": 2,
    "designation": "Field Collection Officer",
    "shiftname": "General Shift",
    "startTime": "09:30:00",
    "endTime": "18:30:00",
    "currentTime": "2026-09-23 09:12:44",
    "punchInBtnTime": "09:15:00",
    "punchOutBtnTime": "18:15:00",
    "token": "eyJ0eXAiOiJKV1QiLCJhbGciOi..."
  }
}
```

If the staff member has no shift yet, `shiftname` is `"Shift Not Yet Allocated"` and the time fields are left out.

RESPONSE 401

```
{ "error": "Invalid UserName or Password" }
```

POST `/logout`

Ends the session. No body.

RESPONSE 200

```
{ "success": { "message": "logged out success" } }
```

6. Staff endpoints (mobile app)

POST /staff/islogin/{id}

Today's punch status for the user. Call it when the app opens to set up the punch button. See section 3 for `atStatus` values. No body.

RESPONSE 200

```
{
  "success": true,
  "data": {
    "currentTime": "2026-09-23 09:14:02",
    "punchInTime": "2026-09-23 09:14:02",
    "punchOutTime": null,
    "lateBy": "",
    "atStatus": 2
  }
}
```

RESPONSE 200 · NOT PUNCHED IN, SHIFT ALREADY ENDED

```
{
  "success": false,
  "data": {
    "currentTime": "2026-09-24 22:00:00",
    "punchInBtnTime": "09:30:00",
    "atStatus": 0,
    "message": "Punch in closed. Your shift ended at 09:30 PM"
  }
}
```

When `message` is present, show it next to the disabled punch button.

POST /staff/getshift/{id}

The shift assigned to the user. No body.

RESPONSE 200

```
{
  "success": true,
  "data": {
    "shiftId": 1, "shiftName": "General Shift",
    "startTime": "09:30:00", "endTime": "18:30:00",
    "punchInBtnTime": "09:15:00", "punchOutBtnTime": "18:15:00"
  }
}
```

POST `/staff/attendance/in`

Punch in for the day with a selfie. Fails if the user has already punched in today. Send as `multipart/form-data`.

BODY

Field	Required	Description
`userId`	Yes	User ID
`shiftId`	Yes	Shift ID (from login or getshift)
`associatedId`	Yes	Staff-to-shift assignment ID
`imageUrl`	Yes	Selfie image file
`latitude`	No	Number, -90 to 90
`longitude`	No	Number, -180 to 180

RESPONSE 200

```
{
  "success": true,
  "data": {
    "currentTime": "2026-09-23 09:14:02",
    "punchInTime": "2026-09-23 09:14:02",
    "lateBy": "",
    "atStatus": 1,
    "message": "Punch In Success"
  }
}
```

RESPONSE 200 · PUNCH IN CLOSED (SHIFT ALREADY ENDED)

Punch in isn't allowed once the staff member's shift end time has passed. Nothing is saved. Show `data.message` to the user and keep the punch button disabled.

```
{
  "success": false,
  "data": {
    "currentTime": "2026-09-24 22:00:00",
    "atStatus": 0,
    "message": "Punch in closed. Your shift ended at 09:30 PM"
  }
}
```

This response has HTTP status 200. Check `success` before treating a punch in as done.

POST `/staff/attendance/out`

Punch out for the day. The location is saved separately from the punch-in location.

BODY

Field	Required	Description
`userId`	Yes	User ID
`latitude`	No	Number, -90 to 90
`longitude`	No	Number, -180 to 180

RESPONSE 200

```
{ "success": true, "message": "Out Success" }
```

Automatic punch out: if a staff member doesn't punch out before midnight, the server punches them out at their shift end time at 12:05 AM. That day's record then has a punch-out time. The next day starts fresh, so the app needs no changes for this.

POST `/staff/attendance/logs/{id}`

The user's attendance history, newest first, 10 per page. Add `?page=2` for the next page. No body.

RESPONSE 200

```
{
  "success": true,
  "message": "Has Log Entries",
  "logs": {
    "current_page": 1,
    "data": [
      { "attandanceId": 500205, "startTime": "2026-09-23 09:14:02", "endTime": "2026-09-23
18:32:10" }
    ],
    "per_page": 10,
    "total": 1
  }
}
```

GET `/staff/attendance/monthlyLog/{id}/{year}/{month}`

Summary for one month: the days present, the days with a permission, and the days on leave. Example: `/staff/attendance/monthlyLog/100001/2026/9`

RESPONSE 200

```
{
  "success": true,
  "data": {
    "userId": 100001,
    "date": "2026-9",
    "presents": ["01", "02", "04"],
    "permissions": ["02"],
    "leaves": ["03"]
  }
}
```

POST `/staff/attendance/dayLog`

Shift times and actual check-in and check-out times for one day.

BODY

Field	Required	Description
`userId`	Yes	User ID
`date`	Yes	Date, `YYYY-MM-DD`

RESPONSE 200

```
{
  "success": true,
  "data": {
    "checkInTime": "09:30:00", "checkOutTime": "18:30:00",
    "actualCheckInTime": "09:14:02", "actualCheckOutTime": "18:32:10"
  }
}
```

POST `/staff/permission/{id}`

Starts or ends a permission (short time away during the shift). The first call of the day starts it and needs a reason and a selfie. Calling it again while a permission is open ends it, with no body. Send as `multipart/form-data`.

BODY (START)

Field	Required	Description
`reason`	Yes	At least 5 characters
`imageUrl`	Yes	Selfie image file

RESPONSE 200

```
{ "success": true, "data": { "permissionStartTime": "2026-09-23 12:00:00", "message": "Permission Request Success" } }
```

GET /staff/permissionStatus/{id}

Today's permission status for the user.

RESPONSE 200

```
{ "success": true, "data": { "atStatus": "Started", "permissionStartTime": "2026-09-23 12:00:00", "permissionEndTime": "" } }
```

POST /staff/leave/{id}

Apply for leave for today.

BODY

Field	Required	Description
`reason`	Yes	At least 4 characters

RESPONSE 200

```
{ "success": true, "data": { "atStatus": 2, "message": "Leave apply request success" } }
```

GET /staff/leaveStatus/{id}

Whether the user has applied for leave today. `atStatus` **1** means leave is applied, **0** means not applied.

RESPONSE 200

```
{ "success": true, "data": { "atStatus": 0, "message": "Leave not applied" } }
```

GET /staff/leaveLog/{id}

The user's leave history.

RESPONSE 200

```
{
  "success": true,
  "data": {
    "userId": 100001,
    "date": "2026-9",
    "leaves": [ { "startDate": "2026-09-03", "is_leave": 1 } ]
  }
}
```

GET `/staff/profile/{id}`

The user's profile. `userImageUrl` is a full URL to the profile photo.

RESPONSE 200

```
{
  "success": true,
  "data": {
    "userId": 100001,
    "firstName": "Karthik", "lastName": "Raja",
    "email": "karthik@example.com", "mobile": "9876543210",
    "userImageUrl": "https://maduraivasantham.com/uploads/staffs/profile/100001/...jpg",
    "address": "12, Anna Nagar, Madurai",
    "roleId": 2, "roleName": "Field Collection Officer"
  }
}
```

If the ID doesn't match a user: `{"success": false, "message": "Invalid User Id"}`

POST `/staff/profile/edit/{id}`

Updates the user's profile. Send as `multipart/form-data` when uploading a new photo.

BODY

Field	Required	Description
`firstName`, `lastName`	Yes	Name
`email`	Yes	Valid email address
`password`	Yes	At least 4 characters
`password_confirmation`	Yes	Must match `password`
`mobile`	Yes	Mobile number
`gender`	Yes	`M` or `F`
`DOB`	Yes	Date of birth, `YYYY-MM-DD`
`address`	Yes	Address
`userImageUrl`	No	New profile photo file

RESPONSE 200

```
{ "success": true, "message": "Profile Updated Successfully" }
```

7. Admin endpoints

POST `/admin/register`

Creates a staff account.

BODY

Field	Required	Description
`firstName`, `lastName`	Yes	Name
`email`	Yes	Valid email address, must be unique
`password`	Yes	Password
`mobile`	Yes	Mobile number (used to log in)
`gender`	Yes	`M` or `F`
`DOB`	Yes	Date of birth, `YYYY-MM-DD`
`role`	Yes	Role ID (from `/admin/roles`)

RESPONSE 200

```
{ "success": true }
```

GET `/admin/shifttimes`

All shifts, 20 per page.

RESPONSE 200

```
{
  "success": true,
  "message": "Has ShiftTime records",
  "data": {
    "current_page": 1,
    "data": [ { "shiftId": 1, "shiftName": "General Shift", "startTime": "09:30:00", "endTime":
"18:30:00", "status": "A" } ],
    "per_page": 20,
    "total": 1
  }
}
```

POST `/admin/shifttime/add` and POST `/admin/shifttime/edit/{id}`

Creates a shift, or updates the shift with the given ID.

BODY

Field	Required	Description
`shiftName`	Yes	Shift name
`startTime`	Yes	`HH:MM:SS`
`endTime`	Yes	`HH:MM:SS`

RESPONSE 200

```
{ "success": true, "message": "Shift Timing Created" }            // add
{ "success": true, "message": "Shift Timing Updated Succesfully" } // edit
```

GET `/admin/roles`

All staff roles (designations).

RESPONSE 200

```
{
  "success": true,
  "message": "Has roles records",
  "data": { "data": [ { "roleId": 2, "name": "Field Collection Officer", "description": "..." } ],
"total": 1 }
}
```

POST `/admin/role/add` and POST `/admin/role/edit/{id}`

Creates a role, or renames the role with the given ID.

BODY

Field	Required	Description
`name`	Yes	Role name

RESPONSE 200

```
{ "success": true, "message": "User Role Created" }   // add
{ "success": true, "message": "User Role Updated" }   // edit
```

POST `/admin/shifttimewithusers`

Assigns a shift to a staff member.

BODY

Field	Required	Description
`userId`	Yes	User ID
`shiftId`	Yes	Shift ID

RESPONSE 200

```
{ "success": true, "data": { "message": "Shift Associated Successfully to this user" } }
```

GET `/admin/staff/profile/{id}` and POST `/admin/staff/profile/edit/{id}`

Same request and response as `/staff/profile/{id}` and `/staff/profile/edit/{id}` in section 6.
